

Viewsys Standalone A virtual license product from thelocads that allows customer to have their own signage system.

Customer can manage their own network using own cloud and services. Virtual license model has been designed for customer to have own CUG requirement and not to deliver services to third party clients.

Thelocads DS solution is easy to use and allows user to use the product and manage it at its end. This is the Next gen version of viewsys and can be used to display HD

*Operates with virtual license

content over system and change at will .

A plug and play module allows the signage to be operated without any hassle

Benefits of product

Next Generation Technology

Viewsys Standalone is based on state of art technology specifically designed for CUG requirement with Virtual License system.

Own Cloud

Customer can have single user billing system and manage the content at will.

Plug and Play

A simplified system that allows many Viewsys Boxes to be connected to one licensed system and increase numbers by changing license over fly.

Content over Fly

Broadcasting of content can be done over fly. Just upload – Verify – Push and content is over screen.

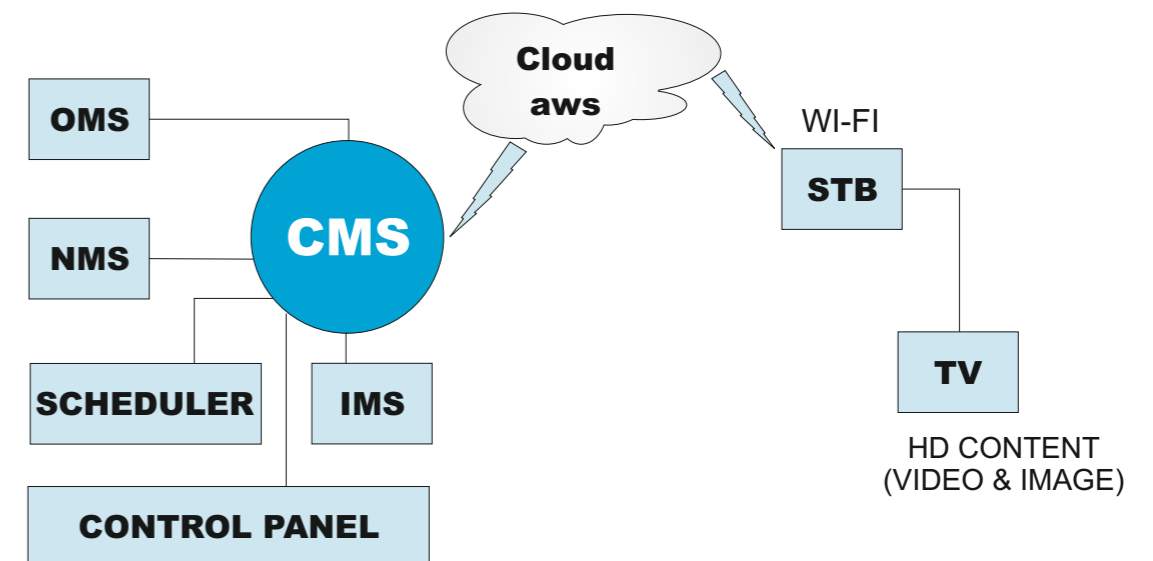

Licensed system

Customer will have a virtual license to operate in CUG mode. The number of remotes can be increased with change it license .

Better Reachability

Using viewsys standalone allows one to have content per screen managed and use at will.
